## Dear Friends,

It is our great pleasure to welcome you to Bologna, on the occasion of the International reference meeting for the 'Critical Care' Macro Area of the Collaborative Research Club.

### First day's focus on:

Mutual update of the state of the art, new acquisitions and research perspectives.

The second day will be a precious opportunity for the participants to the many active protocols to share: work in progress, problems, ideas and opportunities that have emerged during the research.

The first months of 2011 counted an intensive program of Area meetings, where the CRC coordinators and advisors set the focus on a number of possible priorities for shared analysis and discussion.

The Bologna meeting aims at being an important synthetical moment of this Program, and of the intensive work of Collaborative Research, involving all of us.

We are confident that this event will help boosting future activities.

Among the meetings locations, some of the most 'meaningful and historical' places of the city of Bologna, the cradle of history and knowledge, home of the oldest University.

This is Bologna, at the heart of the territory where Bellco's home ever since.

Once more, it will be an opportunity to renew our thanks for your participation and your efforts to the evolution of Collaborative Research.
